

[izmony+rützer]

[izmony+rützer]

a collection of original furniture and collectible pieces that does not catalogue under one style. We love to mix pieces which add personality, individuality and soul to interiors reflecting the open mind of its inhabitants. The pieces we propose are never of industrial perfection but every piece is unique as it is handcrafted. Bumps, scratches, imprints and irregular lines are made intentionally to give the pieces a patina as if they were old and we want them to get more of these as they are being used and really age.

Collectibles - Unikate

Please check our website www.izmonyrutzer.com to see the actual offer as pieces come and go.

Wood essences

All our furniture is HANDMADE and HANDFINISHED in BELGIUM mainly in 4 wood essences, in SOLID WOOD only; WOOD IS A NATURAL PRODUCT SO SLIGHT COLOR DIFFERENCES AND IRREGULARITIES IN THE DESIGN OR ACCIDENTAL KNOTS ARE DUE TO THE NATURAL CHARACTER OF WOOD; THESE IMPERFECTIONS MAKE EVERY PIECE UNIQUE AND ARE PART OF OUR CONCEPT, other then furniture in veneer which will have a repetitive design.

1, **Abachi**; Triplochiton scleroxylon., is an African soft wood with a light mass weight comparable to red cedar; it is ideal for light furniture which is easy to move. The wood is very stable and will not bend. Due to the softness, any bumps and marks of usage will be visible and give a patine easily. Abachi is a durable wood.

2, **Thermo-Limba**; Terminalia Superba. also called african oak.
The wood is thermo-treated to give it a high stability and can be used both indoor and outdoor. For outdoor use we leave it either natural which will become grey like teak wood or if you prefer we give it a colour by applying an anti-UV Oil in numerous colours. Thermo-treated Limba is a durable wood that has a durability of approx 25 years whereas the trees grow in 20 years.

3, **Larch**; Larix; a wood essence that shows a lot of design.

4, **Oak**; we both use first class oak as a more rustic Oak.

For our *collectible items* we are using rare and exquisit exotic woods like **Ebony, Bocote, Grenadilla, Tuya, Zebrano** and many more.

Production and Sizes

As each piece is produced in our Atelier in BELGIUM, SIZES, SHAPES and HEIGHT CAN BE ADAPTED.

Each piece is NUMBERED of which we keep records.
